

WHAT IS WI-FI 6?

HIGH PERFORMANCE, LOW LATENCY, AND ADVANCED SECURITY, HIGHER WI-FI SPEED

4x better capacity in dense deployment

802.11ac

802.11ax

- Wi-Fi 6 is the flagship Wi-Fi standard in use since late 2018
- Wi-Fi 6 is compatible with all legacy devices (802.11b/g/n/ac)

What are some key benefits?

- Higher bandwidth, less congestion, higher device – ideal for AR/VR/UCC
- IoT ready – supports multiple wireless technologies, higher battery life
- More efficient

How is it better than Wi-Fi 5?

- Over 4x the Average Performance
- New Wi-Fi Technology: OFDMA, MU-MIMO, 1024-QAM, TWT
- Higher Security: WPA3
